Subject: change in time of Portland Harbor Lamprey/Sturgeon call - 8/15 12:00-1:00
Date: 08/14/2006 05:56 PM

Hi all -

I would like to confirm the time change of the lamprey/sturgeon call. It will be Tuesday, August 15 from 12:00 - 1:00pm. I apologize if this change means you will not be able to participate.

The call in number is

Non-Responsive

thanks,
Valerie

Subject: Heads up - Possible change in time of Portland Harbor Lamprey/Sturgeon call

Because of some conflicts that came to light late in the planning of this call, it may be rescheduled for Tuesday, August 15 from approximately 12-1pm. Though I can't confirm the time right now, I wanted to alert folks to the strong possibility of change. I will send a confirmation email as soon as possible!

Subject: NOT an Agenda - Portland Harbor Lamprey/Sturgeon call - August 17

Fish Team Call Thursday, 8/17. 3:30 - 4:30pm

Hi all y'all:

On the Manager's Call on Wed PM, 'we' 'decided' that as the first part of a rapidly evolving 'Plan' (developed on the fly during the managers meeting) we would ask Val Oster to get a time for the Fish Team to get together by phone to start the effort. As predicted, she got 'er done (Thanks, Ma'am!). Lisa Saban has also provided a little info on each of 3 focus areas (FSPs?) Windward has been working on , Thanks Lisa!

Fish Team Call Thursday, 8/17. 3:30 - 4:30pm

The call in number will be

Non-Responsive

The "Plan" generally continues that the "Fish Group" gets back together and 'plans' the work that LWG will perform to comply with Dan's recent direction to get from the 'direction' to LWG .

- * 'functional consensus' (i.e., I can live with it...) is our goal
- * Free exchange of pieces of information & drafts of documents as often as makes sense to facilitate common understandings of the facts and help develop 'functional consensus'
- * standing conference call (twice weekly if necessary?) where we would be able to orally touch base and ask questions, etc. about information flying about. Everyone may not be able to make each call, but we mutually catch each other up on our respective 'teams'
- * A timeline that we all understand is now ticking to get this year's ammocoete field collection done (down to 10 degrees Celcius).

Among other things & before September 1, we need to develop the questions, DQOs, hypotheses being tested, design, etc. that have to be incorporated into the well written & useful workplans for the tasks so they're viable & efficient when we produce them. We need to build in scheduling and other realities (budgetary, personnel and biological/physical). We need to decide a logical order to implement the work & what we must accomplish this field season (limit 10C water temp usually by Oct 31 for ammocoete field sampling) so we can have any hope of completing the work by next year.

Realistically, we may have a hope before 10/31 getting into the field to capture enough fish to begin basic lamprey ammocoete animal husbandry training & equipment testing for the team & if we are lucky for the ammocoete tissue concentration related questions. Thinking we can get everything we need to get the ammocoete/lamprey tox testing DQOs fulfilled may be too ambitious, but hey... Getting the numbers of fish (~2-3K) into aquaria & holding them may be possible... We're due a break, no?

Sturgeon sampling scheduling is on a slightly more relaxed schedule & a much simple nut to crack. Permit issues, number of fish, sampling effort limits? on size classes? PLUS sampling is targeted in February-March (roughly?).

Anyway, good to be back in the saddle again? We'll be talking...

Ron

PS - Given that 10/31 happens to be Halloween, I might should dress as a macrophthalmus... See if y'all can still catch me!
